

Senior Analyst

Reports to: Head of Advisory Services

Based in: Nairobi, Kenya

Background

Energy 4 Impact is an international advisory organization supporting the energy sector in Sub-Saharan Africa. We deliver demand-driven, practical, and customised support to SMEs, project developers, social enterprises, and micro-enterprises that provide renewable energy services to off-grid communities.

Our team of 90 people includes primarily locally based professionals who are supported by a small head office in London. The organization is comprised of:

- **Country Teams** in Kenya, Tanzania, Uganda, Rwanda, Senegal. These teams provide business and technical skills training and mentorship to micro-enterprises that deliver “last-mile” energy services, and support them to access finance from MFIs, SACCOs and local banks.
- **Advisory Services team** in Nairobi that provides consulting and advisory to SMEs, project developers and social enterprises, and supports them to secure corporate/project financing.
- Administrative and support staff based in our London HQ and Nairobi regional head office.

Energy 4 Impact is funded by major development agencies e.g Sida (Sweden), DfID (UK), World Bank, USAID, Barclays, OFID, and EU. Since our founding in 2006, we have leveraged \$100 million of grant funding to support more than 3,000 businesses.

Role

This role is within Advisory Services, a Nairobi-based team of professionals from a range of private sector backgrounds including investment banking and private equity, management consulting, law, entrepreneurship, infrastructure project development, micro-finance and engineering.

Our clients are primarily based in East Africa and range in the stage of their development from ideation/pre-pilot to scale-up. We work with companies employing a range of business models and technologies. Many are developing small-scale assets for power generation and distribution (e.g. through mini-grids) using solar, biomass gasification, or hydropower, while others produce or distribute solar lights or home systems, clean cook-stoves or biomass-based fuels.

Our common near-term aim is to help our client develop into a business that will withstand a due diligence process designed to assess its financial, operational and technical robustness. Our ultimate goal is to increase the likelihood that the company matures into a profitable commercial enterprise that plays a meaningful role in electrifying the 1.3 billion people currently without power. In short, we work with companies to increase their prospects for survival and growth.

We help companies develop their business model, enhance operational execution, and access financing. Engagements typically consist of some combination of management consulting or capital advisory, market research, and assistance developing new partnerships. Many clients find significant value in our knowledge of, and preparation for, financiers – from commercial private equity firms, to impact investors or donors.

We have completed more than 220 engagements with more than 112 companies, and our clients have raised a cumulative \$83 million of debt, equity and grants since engaging with us.

Responsibilities for the role include:

- Support SME Advisors in conducting advisory engagements (which span strategy consulting, investment readiness, partnership facilitation, project development support, and “customized projects”) with renewable energy SMEs, social enterprises and project developers.
- Conducting advisory engagements (which span strategy consulting, investment readiness, partnership facilitation, project development support, and “customized projects”) with renewable energy SMEs, social enterprises and project developers with support and guidance from SME Advisors.
- Working closely with SME Advisors and supporting them by doing data research, market research, creating graphs and presentation.
- Conduct Trainings and Workshops on relevant topics (technical and business related to energy access) to entrepreneurs, SMEs and other participants.
- Developing projects that fit Energy 4 Impact’s priorities/capabilities with current or new clients.
- Helping to develop Energy 4 Impact’s internal processes and knowledge of technologies, business models, regulatory issues, financing process, etc.
- Delivering high quality work, with attention to detail and a focus on results.

Requirements

Academic Qualification & Experience

- 3-5 years of experience in energy project development, operations, or financing; or experience in early-stage entrepreneurship
